July 2016

PORTABLE RELOCATION AND RENOVATION PROJECT

The first big project awarded to our newly contracted architectural firm, BCA Architects, is well underway with our Portable Relocation and Renovation Project. Alyce Norman previously housed 6 portable classrooms that could have been serving the students' and District's needs at a better capacity.

Therefore, these portables are getting a fresh makeover with ADA upgrades and updated technology to be used at Elkhorn, Yolo, Westfield, and Maintenance, Operations and Transportation (MOT).

We look forward to completing this project by August 1, 2016. When completed, the portables will be available for MOT to install brand new HVAC units. The project will be completed for the new school year, ready for students to learn in modern, comfortable and cool classrooms.

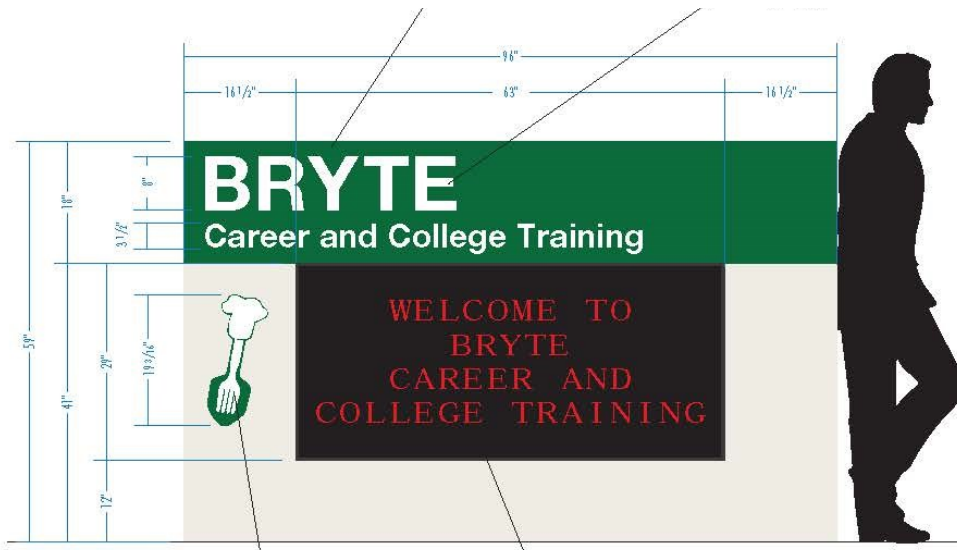

BRIDGEWAY ISLAND MARQUEE

Facilities was excited to have Ellis and Ellis Sign Systems start preparations for the electronic marquee that will begin construction this month at Bridgeway Island! Heavy machinery began by demolishing the preexisting manual marquee that once stood on the site.

The electronic marquee will help keep parents and the surrounding community more informed by the beginning of the upcoming school year. Go Bees!

Bryte Career and College Training Campus is the next in a series of electronic marquees that will be installed District wide. Bryte will also receive their electronic marquee this summer. The Bryte marquee is in manufacturing and will begin construction the first week in August.

Facilities will be sure to

give an update when these marquees are complete. WUSD is thrilled to be able to keep our students and families up to date using these modern marquees. Although Bridgeway Island and Bryte are only the fourth to obtain electronic marquees (in addition to Riverbank and River City), Facilities' goal is to assist in bringing the District 2 marquees per year until each campus has one displayed on their grounds. You may see one pop up in your neighborhood!

DISTRICT OFFICE PARKING LOT

District Office staff is eager to put their new parking lot to use. With the striping and basketball court (for Cesar Chavez student use) painted this week, employees can tell that the day is approaching soon!

In order to preserve the integrity of the new asphalt, a new trash enclosure has also been completed. The only remaining factor is that of fencing to protect the adjacent solar arrays and to secure the grounds of the District Office.

This new parking lot has undergone a thorough soil treatment and series of compaction tests to assure that this new parking lot will stand the test of time.

This upgraded parking lot will serve for District Office employee parking. The front parking lot will be reserved for guests and visitors to the District Office. District Office employees can anticipate parking on their new smooth parking lot by the end of this month!

OTHER SUMMER FACILITIES PROJECTS INCLUDE:

Alyce Norman
Cafeteria Roofing
Project

Riverbank Portables
Roofing Project
